

vBulletin programmer

mp3Car.com is looking for an experienced vBulletin programmer to support the company's online forum development, on a project basis. Proximity to the Baltimore, MD office is preferred, but not required.

Experience required as follows:

- Extensive experience with vBulletin
- Knowledge of PHP, My SQL, Java Script
- Web application development skills
- Code documentation experience

Job description as follows

- Updating vBulletin and plugins
- Researching vBulletin and plugins
- Code customization

Please email forums@mp3car.com the following: a sample of projects, resume, links to online forums for which you have provided support, references, and hourly rate.
